THOUGHT NOTE

Assignment: TAX CALCULATOR

Technology Used: HTML, CSS, JavaScript.

➢ I have created the Tax Calculator with the help of HTML, CSS, and JavaScript. I have created two html files **(index.html and result.html)**, one Cascading Style Sheet file **(styles.css)** and one JavaScript file **(script.js)**.

➢ The user can enter the mandatory field such as Gross Total Income, Select Age Group, and total Deductions. After entering it, click on the Calculate tax button.

➢ The total tax to be paid after deduction will be displayed in the next html page **(result.html)**.

➢ All the styles are done in the **(styles.css)** which is linked with the index.html page.

➢ All the conditions and tax calculations are done in the JavaScript file **(script.js)**.
